Office Action Summary

Application No.

10/534,670

Applicant(s)

KILJANDER, HARRI

Examiner

ANDREY BELOUSOV

Art Unit

2174

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 July 2010.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4,5,8-15,17,18,20,23-25 and 28 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4,5,8-15,17,18,20,23-25 and 28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

1. This action is in responsive to the amendment filing on 7/22/2010. Claims 1, 4-5, 8-15, 17-18, 20, 23-25, and 28-29 are pending and have been considered below.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 4, 6, 8-10, 13-15, 17-18, 23, 25, 28, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Task (Windows Task Manager, Copyright 1981-2001 MS Corp) in view of Next (NeXT Step 3.3 Copyright (c) 1995 by NeXT Computer, Inc) in further view of Sciammarella (7,051,291) and in further view of Onodera (6,710,707.)

Claim 1, 13, 14, 15, 17, 28, 29: Task discloses a device, comprising:

- a. a processor; and
- b. at least one memory including executable instructions, the at least one memory and the executable instructions being configured to, in cooperation with the at least one processor, cause the device to perform at least the following:
- c. receive a request for access to a menu from a user (Fig. 2-3, clicking the Application tab);

- d. compile the requested menu, said menu including a list of menu options associated with currently active application (Fig. 3, 4: "Running") and inactive applications (Fig. 4: "Not Responding");
- e. determine whether each application associated with a menu option is currently active (Fig. 3, 4: Status);
- f. add a flag to each menu option (Fig. 4: "Running", "Not Responding") associated with a currently active application (e.g., Fig. 3: Microsoft Outlook application);
- g. display the list of menu options (Fig. 4) and a focus region (Fig. 3: "Inbox – Microsoft Outlook" is within a focus region, i.e. highlighted) having a movable position (Fig. 3: applications may be selected by a mouse or direction arrows, thereby moving the focus region);
- h. select one of said menu options (Fig. 4, selection of one of the applications which grays out the application icon/text) by moving the position of the focus region to the same location as the menu option (Fig. 3: applications may be selected by a mouse or direction arrows, thereby moving the focus region, or highlighting another application menu option);
- i. present a status indication (Fig. 3: "Running" flag indicates an active status, whereas, "Not Responding" flag indicates an inactive status) for the selected menu option based on whether the selected menu option is flagged (Fig. 4: "Running", "Not Responding", if the application is flagged as active the indication of status presents a "Running" indication, otherwise if it is not flagged as active, it presents "Not Responding" indication); and

- j. provide access to an application associated with the selected menu option, whether said application is active or inactive (providing the option to "End Task" that particular application, Fig. 4) when selected.

However, Task does not explicitly disclose wherein the status indication is non-textual. Next discloses a similar Operating System device comprising a user interface and a processor, wherein a status indication is non-textual (pg. 5, three dots.) Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include the teaching of Next in Task so as to present the status indication in a non-textual manner. One would have been motivated to combine the teachings of Next and Task, as it would have been a mere design choice to incorporate the status indication in a non-textual manner.

Task does not explicitly disclose presenting an indication of a status for *only* the selected menu option. Sciammarella discloses a method that discloses information (Fig. 1: 26) only about a particular selection (Fig. 1: 24) selected from a plurality of options (Fig. 1: 23, 24.) Therefore, it would have been obvious to combine the teachings of a method for presenting menu options of applications Task with Sciammarella's design choice for presenting information only for the currently selected option. One would have been motivated to combine the teaching of Sciammarella's design choice for presenting information for currently selected option, so as to not overwhelm the user with information not presently pertinent to the current selection.

Task does not explicitly disclose an audible alert for the selected menu option. Onodera discloses a similar input means including audible alerts that correspond to

selections made (4:25-34.) Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include the teaching of Onodera in Task so as to further notify the user of the selection made through audible means. One would have been motivated to combine the teachings of Onodera and Task, so as to enable a user to ascertain the selection made based solely on sound (Onodera, 4:25-34.)

Claim 4, 23: Task, Next, Sciammarella and Onodera disclose a device according to claim 1. Task further discloses wherein the presentation of the menu option includes an icon displayed in the list of menu options (Fig. 3.)

Claim 6, 18, 25: Task, Next, Sciammarella and Onodera disclose a device according to claim 4. Next further discloses wherein the application status is indicated by the color properties of the icon (pg. 5: white highlight indicated a 'starting up' status.)

Claim 8, 20: Task, Next, Sciammarella and Onodera disclose a device according to claim 1. Onodera further discloses wherein the audible alert is a sound corresponding to the selected menu option and the status indication (4:25-34.)

Claim 9: Task, Next, Sciammarella and Onodera disclose a device according to claim 1. Task further discloses further comprising a user interface wherein the user interface

comprises a display and a keypad (Fig. 3, keyboard is an inherent feature of a computer.)

Claim 10: Task, Next, Sciammarella and Onodera disclose a device according to claim

1. Task further discloses further configured to allow multitasking of applications (Fig. 3.)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Task in view of Next in further view of Sciammarella in further view of Onodera and in further view of Gillespie et al., (2002/0191029.)

Claim 5, 24: Task, Next, Sciammarella and Onodera disclose a device according to claim 4. However, Task and Next do not explicitly disclose wherein the status is indicated by the animation of the icon. However, Gillespie teaches a device with a user interface utilizing a visual convention of animating activated icons (par. 0060.) Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the teaching of Gillespie to the combination of Task

and Next. All the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, and the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

6. Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Task in view of Next in further view of Sciammarella in further view of Onodera and in further view of Shields et al., (5,910,802.)

Claim 11, 12: Task, Next, Sciammarella and Onodera discloses a device according to claim 1. However, Task and Next do not explicitly disclose that such a device is a handheld telecommunications device. Shields discloses a scaled down version of an operating system, Windows CE, which is run on a handheld telecommunications device (1:10-15; 2:43-50.) Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teaching of Task and Next to a handheld telecommunications device of Shields. Such a combination would have been obvious because the design incentives or market forces provided a reason to make an adaptation, and the invention resulted from application of the prior knowledge, of Task and Next, in a predictable manner to a new platform (i.e. handheld) as disclosed in Shields.

Response to Arguments

Applicant's arguments with respect to claim 1, 4-15, 17-20, 23-25, and 28-29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Belousov whose telephone number is (571) 270-1695. The examiner can normally be reached on Mon-Fri (alternate Fri off) EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dennis Chow can be reached on (571) 272-7767. The fax phone number for the organization where this application or proceeding is assigned is 571-273-3800.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
